INX SAM Suite

Version 6.3.55 release notes

Date: 7 February 2025

iNXSAMSUITE

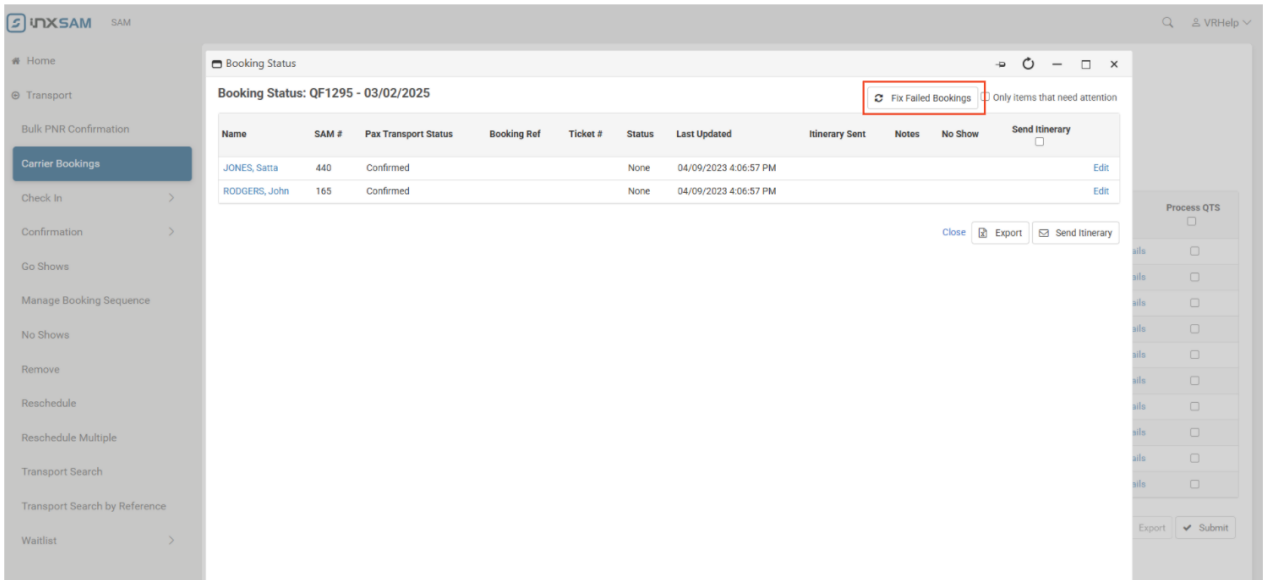

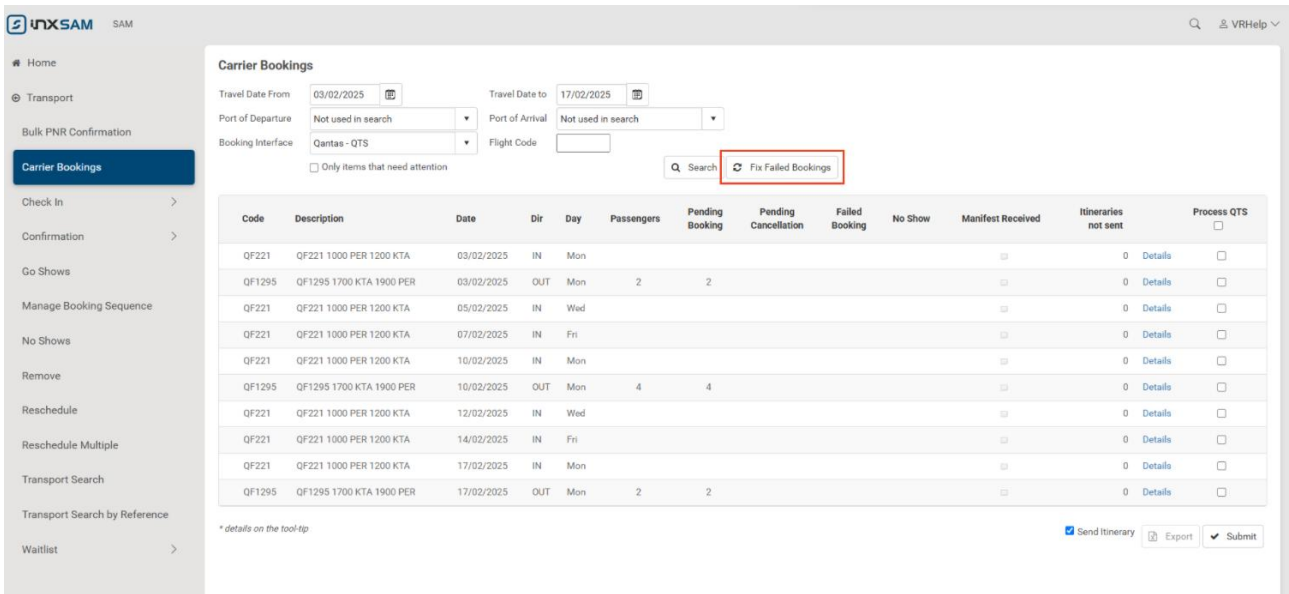

Table of contents

New features	3
Improvements	5
Fixes	7

New features

Bulk correction feature in the Carrier Booking page

The **Carrier Booking** page in SAM now allows users to correct multiple failed bookings in a single action, eliminating the need to manually update each failed booking individually and streamlining the process to make retries more efficient.

New Room Move filter on Arrival and Departure pages

To help improve visibility and make searching for rooms more efficient, SAM users can now filter for room moves on the **Accommodation Arrival** and **Accommodation Departure** pages. [Canny]

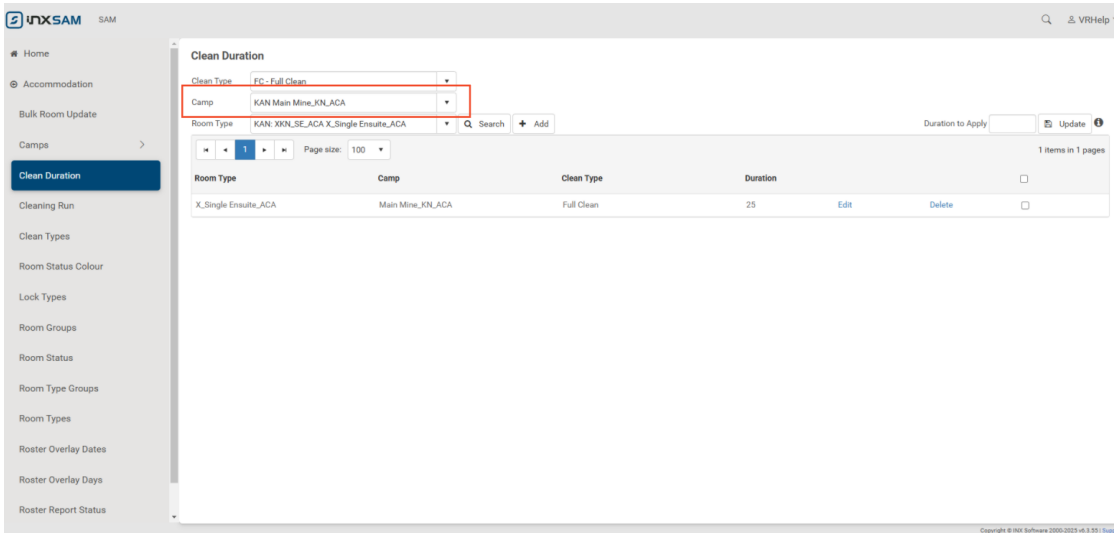

The screenshot displays the iXSAM SAM interface for the 'Accommodation Arrival' page. The left sidebar contains navigation options: Home, Rooms, Accommodation Arrivals (highlighted), Accommodation Departures, Assign Room, Assignment Check, Cleaning, Reactivate / Deactivate Rooms, Room Add, Room Lock, Room Maintenance, Room Search, Room Swap, and Waitlist. The main content area includes search filters for Check In Date (03/02/2025), Camp (KAN Main Mine_KN_ACA), Room #, First Name, Surname, Person #, Clean Status (All), Room Type, Room Status, and Transport. A new 'Filter' dropdown menu is highlighted with a red box, showing the option 'Show only room moves'. Below the filters are buttons for Search, Clear Filter, and Check in All People. The table below shows a single room entry for BARTLETT, Warren (564549) with room type S003a (KN - Single Ensuite - no cleaning setup), arrival date 03/02/2025, and last night 05/02/2025. The table also includes columns for Apply, Name, Room Type, Employer Cost Code, Arrival Date, Last Night, # Days Late, Check In, No Show, Reschedule, Cancel Booking, and Room Status. A red box highlights the 'No Show' checkbox, which is currently checked.

Apply	Name	Room Type	Employer Cost Code	Arrival Date	Last Night	# Days Late	Check In	No Show	Reschedule	Cancel Booking	Room Status
<input type="checkbox"/>	BARTLETT, Warren 564549	S003a KN - Single Ensuite - no cleaning setup	X - Shutdown Co X-CC X-40004	03/02/2025	05/02/2025	NA	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	DS Day Shift

Improvements

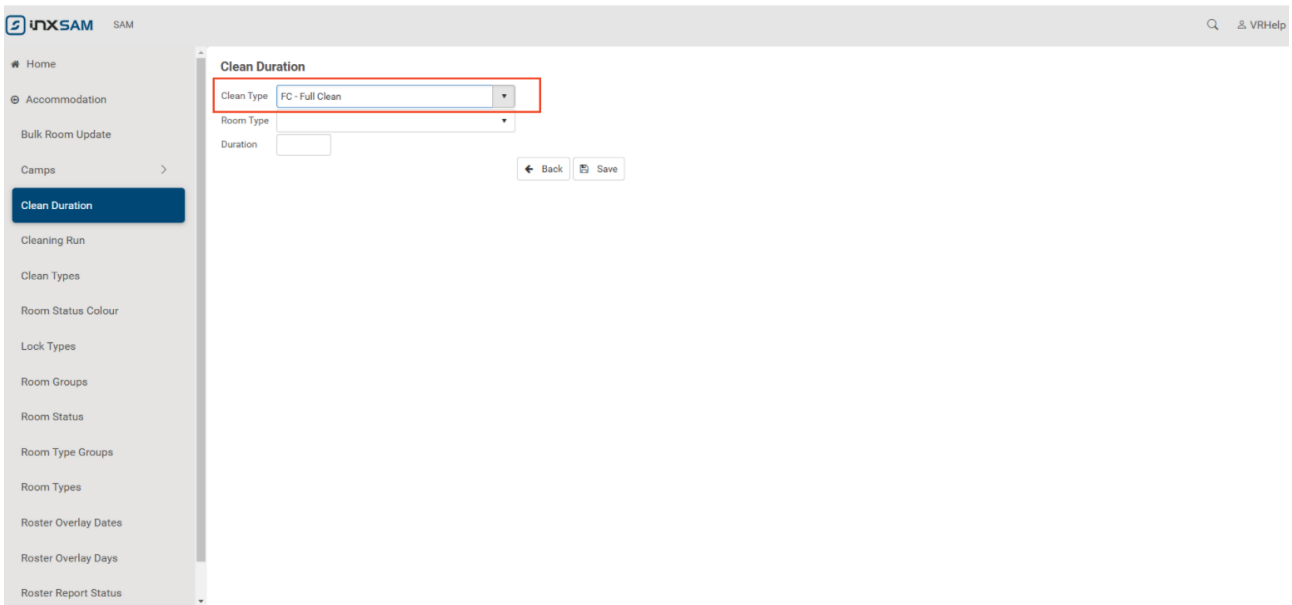

Improved search criteria for filtering and navigation

The **Clean Durations** page (accessible via **Admin > Accommodation > Clean Duration**) now includes the new search criteria “Camp”—simplifying filtering and navigation for users.

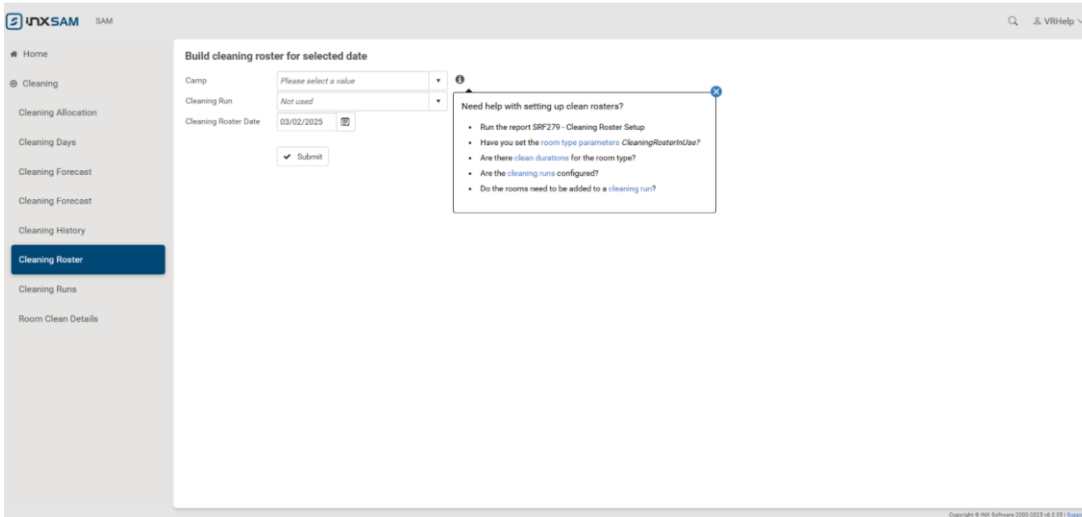

Enhanced Clean Type display for easier configuration

When adding a new clean duration, the Clean Type field has been widened—improving visibility of your selection for easier configuration.

New tooltip introduced for the Cleaning Roster

On the **Cleaning Roster** page (accessible via **Rooms > Cleaning > Cleaning Roster**), a tooltip has been introduced. This tooltip helps users ensure all required details are correctly configured to successfully running a cleaning roster.

Synchronised clean status for Couple Rooms

We have improved the **Accommodation Arrival** page to ensure the clean status of Couple Rooms are properly synchronised. Now, when a couple arrives on the same day (with one person in the master room and the other in a virtual room), both rooms will display a consistent clean status.

Future Room Ownership now available for all lengths of stay

The Future Room Ownership feature in SAM is now available for all profiles with a future accommodation booking, regardless of length—helping provide broader visibility and accessibility for all upcoming stays.

Fixes

Multiple bookings now support alternative camp location

Users can now make multiple bookings and update the camp to an alternative location in SAM. With the 'AllowBookingToOtherLocation' parameter set to "Y", SAM no longer restricts camp selection to the on-site location, enabling users to choose any camp from the room search dropdown.

Enhanced multisector Folio processing

When final approvers process Folio documents containing a multisector, the Folio anchor dates now validate correctly ensuring smoother processing of new multisector bookings [#70742]

Improved alignment in Workflow Folio tabs

To ensure a seamless user experience in INX SAM Suite, we have resolved an issue where the requested tab and the processing tab within a Workflow Folio document were not consistently aligned [#70638]
