# INX SAM Suite

Version 6.3.36 Release Notes

Date: 26 June 2023

## Contents

New feature .....	2
Improvements .....	4
Fixes.....	5

## New enhancement

In SAM, on the Carrier Bookings page while viewing the booking status page, a user is now able to click on the traveller's name and be taken directly to their profile page. [Canny]

## Improvements

Improvements have been made to the following:

- In SAM, on the Group Booking page, the maximum value of 1000 has been removed from the Requested # of Rooms column. [#43148]
- In SAM, when parameter **ShowBookingRef** = N. The Booking Ref# value is not displayed on the itinerary generated from menu SAM | Reports | Transport | Itinerary | By Person OR By Person Accom & Transport. [#42922]
- Upgrade messages have been updated to reflect the correct version of an upgrade.
- In Workflow, a folio request will now display on the task panel with the correct days away to reflect the first affected modified date, inclusive of both accommodation and transport dates. The days away was previously only calculated from a transport date. [#35869]
- In SAM when parameter AllowSameFlightCodeOnTheSameDay=N, the result message has been updated when a user creates a new transport type that already exists but is inactive. [#31956]
- In SAM, on the carrier bookings page, a warning message has been introduced to alert users that by editing the 'Status' of a passenger will result in the manual override of the flight integration.

## Fixes

Fixes have been applied to the following:

- While processing a roster, transports were incorrectly showing as drives when changes were made to the location of the room type and Future Room Ownership. [#41221, #41573, #36717]
- In SAM, where waitlisted passengers were not promoted upon increasing the seat allocation. [#40821]
- In Workflow, the send itinerary failed when the traveller's name included special characters. [#40647]
- **SRF323 Permanent Room Owner Utilisation** was incorrectly displaying non-room owners. [#39431]
